Sale of Furs

Our Advance Sale of fashionable furs offers price advantages that you should not fail to avail yourself of.

Spanish Americans In New Mexican Convention

(Gra M. Bond in New York Sun.)

In the Sun of September 24 appeared a letter from "An Interested Observer" under the heading "Old Mexico in New Mexico," in which the names of all the members of the newly elected constitutional convention with Mexican names were printed, followed by remarks intended to hold them up before the country to contempt simply because they are Mexicans. The letter is dated from Albuquerque.

I accompanied Gen. William A. Pile from St. Louis to Santa Fe when he was appointed governor of New Mexico in 1890, and during a residence of about 25 years I held several official positions, including that of United States and territorial clerk of the third judicial district court under four judges, and I published a paper for several years.

Under the treaty of Guadalupe-Hidalgo after the war with Mexico, the inhabitants were permitted to declare their allegiance to Mexico or become citizens of the United States. Not 100 of about 90,000 announced a desire to remain citizens of Mexico, and all the others became American citizens. In the Civil war, with only a few years' citizenship, New Mexico furnished a larger proportion to the Union army than any of the northern states did. In the Spanish-American war New Mexico was strongly represented in the Rough Riders.

In the campaign of 1898, when the states west of the Mississippi went wild for Bryan and free silver, the conservative Mexicans of the territory elected a Republican to congress by nearly 3000 majority on a straight gold platform. The Mexicans then had three-fifths of the votes; they now have less than two-fifths. The disfranchisement of the Mexicans in Arizona has driven thousands of Mexican Democrats to the Republican party in New Mexico; so that New Mexico is now safely Republican by about 10,000 majority.

Now a few words as to the names of a few published in the Sun. Solomon Luna has been for sixteen years a member of the Republican national committee. His brother was a member of congress. Solomon Luna was unanimously nominated for congress several times, but having to care for about 100,000 head of sheep and being president of a bank with about a million and a half dollars resources, he was compelled to decline the nomination. His nephew, Max Luna, was a captain in the Rough Riders and while

MINING AND OIL NEWS.

MANY NEW CLAIMS IN DURANGO FIELD

The Mining Activity Around Torreon, Mex., Shows Decided Increase.

Torreón, Mex., Oct. 10.—Gerardo M. Archea, a well known mining man of Culiacan, has applied for titles to mining claims in the Torreon mining district to embrace the extension of the vein of the Soledad mine. Evaristo Paredes has been appointed by the mining agent to make the official survey and plan the group.

At Santiago Papasquiaro, Natividad Rodriguez has located a large number of new claims, divided into two groups, one to be known as the Carmalita and the other El Cleon. Mr. Rodriguez was formerly mining in the Guanacavi district where he successfully operated various mining properties.

Mining continues active in the Inde camp, the most recent denouncement having been made by Ismael Miranda on a group of five claims about four miles west of the camp. There are a number of American mining men and companies operating in Inde and all of them are meeting with success.

Peoples' Denies Dividend.

The Peoples Mining company of Mapimi, the largest mining and smelting company operating in the state, has declared a dividend of \$3.12 1/2 per share on the new issue of increased stock certificates. This is equal to \$100 per share on the original stock. A number of new properties have been taken up in that camp, which is continually on the boom.

The Santa Maria del Oro district is another camp of the state of Durango which is forging to the front. Alberto Bolivar has applied for titles to a group of 10 claims adjoining the La Reina mine in that district and a number of other mining men have staked claims which will be proven in the near future.

Americans Putting In Plant.

The El Paso Foundry and Machine company has shipped a 50 ton lead-silver furnace to the Reyes mining district, where a number of Americans are putting in a plant on their properties. The plant is to be in charge of the well known smelter man, Wm. H. Dally.

Many of the miners have been greatly benefited by the recent rains, as in places the water supply for the camps was getting scarce.

W. H. Williams, formerly in charge of the Comahu Mining and Smelting company's properties at Mapimi, has taken the management of La Roca mine in the Velardena district, and is getting out some rich ore.

The Eureka Mining company, with headquarters in the city of Durango, is shipping high grade ore to the Velardena smelter from its mines in the western part of the state.

The new club house at the Velardena smelter for the benefit of the employees is now completed and is equipped with modern bowling alleys, billiard parlor, dancing pavilion, reading room, etc.

NEW DIRECTORS ON INSPECTION VISIT

El Triunfo to Have a New Smelter in Operation Shortly.

Cananea, Mex., Oct. 10.—At the annual meeting of the stockholders of El Triunfo Consolidated Mining company, held at Bisbee, Ariz., the following directors were chosen for the year: Reinman, Dr. S. Newton Leo, Julius G. Miller, Henry Stern, Wm. H. Freytag, I. Neuberger, A. W. Wand, D. Powdermaker, Dr. Moritz Gross, Adolph Oltmann and John H. Brown.

After the meeting those attending came to Cananea and went to the property. The party included president A. C. Charlott, vice president T. B. Johnston, directors I. Neuberger, D. O. Johnston, and W. Bennett. Great activity has been displayed at El Triunfo mines. John Martin, the superintendent, well known in Cananea mining circles, as well as all over the southwest, has been finishing up the new plant, which has been usually met with in mining enterprises in this section of the country.

A three mile pipe line connects the mines with the Sonora river, where a powerful pump will raise the water necessary to operate the concentrator and for other uses. Very little has been said about El Triunfo in the past, although president Charlott is well known in Cananea, especially among the old timers.

Is a Rich Producer.

El Triunfo has the record of having produced some of the richest matte ever sold to the Cananea Consolidated company. The first smelter was in operation at El Triunfo and two tons were shipped to Cananea which paid 1250 ounces in silver, seven ounces in gold and a high percentage in copper. During the panic of 1907 the Triunfo continued operations when other companies in the district were forced to suspend operations, and the mines have been known to have been working steadily in spite of hard times. A concentrating plant is running at the property preparatory to the erection of a 50 ton smelter, which is to be erected at once. Plans and specifications have been prepared and the order will soon be placed. The approximate time for the completion of the smelter is about 90 days, as all the heavy machinery, such as boilers and engines, etc., is now on the ground. Thousands of tons of ore have been extracted during the past few years and the ore is very rich in silver. The concentrator will be kept in operation while the smelter is being constructed, thus enabling the company to produce high grade matte.

GREENE-CANANEA REPAIRS STORM DAMAGED GENERATOR.

Hardy Wins Suit for Possession of Cordon de Cobre Denouncement After Several Years.

Cananea, Mex., Oct. 10.—The damage done to the big turbine generator at the power plant of the Greene-Cananea company in a recent electrical storm has been repaired. For about a week electrical power has been supplied to the plant in a number of the different mines, and the reserve electrical equipment was in commission for some time.

HAMLET

had melancholy, probably caused by an insect liver. A bad liver makes one cross and irritable, causes mental and physical depression and may result disastrously.

Ballard's Hamlet is acknowledged to be the perfect liver regulator. If you're blue and out of sorts, get a bottle today. A positive cure for bilious headache, Constipation, Chills and Fever and all liver complaints.

Sold by all druggists.

STATEROOD LIABLE TO BE A FAILURE

(Continued from Page One.)

The Ricketts dam in Concentrator gulch is being reconstructed and will be of the same kind as that on the western side of the gulch.

The seventh furnace has been discontinued at the smelter and six furnaces are now in operation.

The announcement made recently that the company was to handle the entire output of the concentrating plant of the Miami company at Globe is of great interest to people interested in the company. The Miami plant will be started about the first of the year, and will have a capacity of 100 tons of concentrates daily. There will be shipped to Cananea, where they will be smelted.

Hardy Wins His Suit.

J. W. Hardy has won his suit for possession of the Cordon de Cobre denouncement, which has been in the courts for several years. The denouncement was made by Hardy in April, 1905, and was also claimed by the Four C's company.

The Cananea-Bonston has begun crosscutting in its No. 1 shaft at a depth of 70 feet. The shaft has been driven the entire depth. Stringers of native silver have been encountered in the new cross cuts and considerable lead ore is being opened up. The Reeves shaft is being sunk to a greater depth and the ore will be worked from below.

South Tigre Bays Interest.

The South Tigre company has purchased a two-thirds interest in a property belonging to Robles and Sanchez, which adjoins them. Payment was made in full on October 1, and the company expects to spend considerable money in developing the property.

The Mesa Rica property in the Sahuaripa district is preparing to install a cyanide plant, one of the most modern types.

Rich Strike Reported.

The Buena Vista mine, below Realito, is reported to have made a rich strike. The shaft is down 110 feet and at that depth a cross cut was driven through the ledge which yields rich gold, silver and copper values. The shaft will be sunk to 200 feet, when cross cuts will be extended in different directions.

USED EXPLOSIVE OF HIGH POWER

(Continued from Page One.)

ly and definitely located by evidences that are complete and convincing.

The explosion of this explosive was of high power, such as nitro-glycerine or a product of nitro-glycerine, and was heard at the time of its explosion in the deck of the passenger car, and running easterly from Broadway on a level with the street and over the basement used by the Times-Mirror company as a press room. The position of this explosive was at a point about 30 to 35 feet from the Broadway street line and close to the north-east wall of said passageway or alley above described. Respectfully submitted,

"O. J. Sweet,
"Z. Cushing,
"J. S. Carman,
"E. H. Fosdick,
"Chas. Wellborn,
"Wm. Mulholland."

SEVENTEEN VICTIMS OF TIMES DISASTER BURIED

Impressive Service, Attended by 2500 People, Is Conducted by Dr. Robt. J. Burdette.

Los Angeles, Cal., Oct. 10.—Seventeen of the 20 or more men who lost their lives in the explosion which wrecked the Times newspaper plant nine days ago were laid to rest Sunday in graves side by side in Hollywood cemetery. One funeral service was held for all, in Temple Auditorium, which was crowded by 2500 men and women, while a greater crowd, unable to enter, stood outside in solemn silence.

All the principal pulpits of the city denouncing the outrage.

Rev. Dr. Robert J. Burdette, pastor emeritus of Temple Baptist church, conducted the services, assisted by two other clergymen. A chorus of 50 men rendered several hymns.

In his final address, Dr. Burdette eulogized the victims of the explosion as heroic martyrs to duty who had gone on working faithfully in spite of frequent threats that they would be killed in the manner in which they finally did meet death. He voiced a justification of the position Gen. Otis and his newspaper have taken regarding the matter that prompted the destruction of the plant and its men.

THREE CANANEANS RELEASED ON BOND

Navarete Taken to American Side; Smuggling Cases May Be Dropped.

Cananea, Mex., Oct. 10.—N. D. Navarete was released Saturday night at about 8 o'clock under \$300 bond and was escorted to the American side of the line and released.

This was done by orders emanating from the City of Mexico.

The orders also were that the testimony of Navarete was not to be used against the business men who were implicated by his testimony, and as a result, Gaston Schwab was liberated on \$1000 bond, and Mrs. S. J. Artea on \$200 bond. They were liberated from the jail Saturday night at 7:30 o'clock.

This closes the incident as far as the Mexican government is concerned. It is probable that no other steps will be taken against the implicated parties and that the charges will be eventually dropped.

Navarete arrived in Naco, Ariz., Sunday morning at 4 o'clock.

VERMONT GROWS SOME BUT NOT VERY MANY.

Washington, D. C., Oct. 10.—The population of Vermont, as shown by the census, is 355,956, an increase of 2,315, or 2.6 percent over 1900.

EXPERTS TRYING TO SAVE MINERS

(Continued from Page One.)

some of whom are dead but the most of whom are safe in Rainey River and the adjacent towns on the Canadian side of the line. Many homesteaders and farmers are in the brush for a distance of 100 miles east and 200 miles south. Of these nothing can be learned for some time, as searching parties do not dare penetrate the smoking forests.

Origin a Mystery.

The origin of the explosion, which practically destroyed the east slope of the Starkville mine is a mystery. The mine has always been classed as non-gaseous and for this reason safety lamps were not believed necessary to the equipment of the miners. It is also what is known as a pick mine, no shot firing to dislodge the coal being allowed.

Rescuers Forced to Retreat.

A low rumbling sound and a slight earth tremor, resembling a seismic disturbance noticed in Starkville, several surrounding camps and Trinidad, five miles away, were the first evidences of the disaster. Within a few minutes thereafter mine superintendent James Wilson had organized the first rescue party, equipped with oxygen helmets, and started into the mine. On through the darkness the men went for an unknown distance until Wilson, weakened by a previous illness, fell overcome by the poisonous black damp. Carrying their leader, the party retraced their steps, reaching the outer air just in time to prevent others from collapse.

Is an Old Mine.

The Starkville mine is one of the oldest Colorado Fuel & Iron company properties in the southern Colorado fields. The old entry, or main slope pierces the hill at a point about a mile and a half northeast of the tipple and camp. This slope penetrates the coal deposit for a distance of nearly five miles, the entry for nearly half the distance being bordered by older abandoned workings.

About 300 yards south of the old portal the second entry or new shaft enters the hill and runs back almost parallel to the old slope, which is now used as the main haulage way. About a mile from the portal of the new entry, a crosscut connects it with the old entry.

FROST AT MARFA.

Marfa, Texas, Oct. 10.—A light frost fell here while a killing frost was reported from the Chambers ranch. Fires are comfortable mornings and evenings.

Moving day.—Snyder Jewelry Co.

GOV. CAMPBELL WORSE.

Austin, Texas, Oct. 10.—Governor Campbell is reported a little worse today, but his physicians announce that his condition is not alarming, though serious. He had been in bed since Thursday, suffering from malarial fever.

CALISHER BUILDING TO START AT ONCE

New Structures to Be Built on Corner of Texas and Stanton Streets.

This week will see the passing of the brick building on the northwest corner of Texas and Stanton streets, which will be wrecked for the new Calisher department store, which is to be rushed to completion as rapidly as possible after the election of J. Calisher, president of the J. Calisher company, accompanied by J. C. Northman, returned Saturday from New York.

The new Calisher block will be started within the next two weeks and will be completed as rapidly as possible. The contractors are bidding on the building and the award will be announced Saturday.

PHOTOGRAPHS TAKEN OF MILLS BUILDING

While Gen. Anson Mills was here last week from Washington to inspect the work on his new 12 story building, he had a series of pictures made of the big skyscraper as it is at the present time. These pictures will form a part of the general collection which will show the old Mills building being wrecked, the site of the new building cleared and the various stages of the work on the new building. In one of the pictures that were made last week, Gen. Mills, architect H. C. Trost, superintendent Morris and postmaster J. A. Smith are shown standing in front of the main entrance to the building.

MARBLE STAIRS FOR MOREHOUSE BLOCK

The white marble for the stairway of the Morehouse building on Oregon street has arrived and the main entrance and stairway of the building will be built and the marble set on the sides and treads of the building.

PAVEMENT TORN UP.

The paving on Mesa avenue, in front of the Rio Grande building, is being torn up to place a water main in the basement of the building.

If You Need a Medicine, You Should Have the Best

Although there are hundreds of preparations advertised, there is only one that really stands out pre-eminent as a remedy for diseases of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest, for the reason that it has proved to be just the remedy needed in thousands upon thousands of even the most distressing cases.

Swamp-Root makes friends quickly because its mild and immediate effect is soon realized. It is a gentle, healing vegetable compound—a physician's prescription for a specific disease.

Swamp-Root is not recommended for everything.

A Swamp-Root Certificate of Purity is with every bottle.

For sale at all drug stores, in bottles of two sizes—fifty-cents and one-dollar.

SAMPLE BOTTLE FREE BY MAIL.

In order to prove what Swamp-Root, the great kidney, liver and bladder remedy will do for you, every reader of the El Paso Daily Herald who has not already tried it, may receive a sample bottle by mail absolutely free.
